

# A Beautiful World

Troy Chou

I am unique and special in many different ways  
Like cheering up my family,  
Or helping my friends, and making their day.

I respect the environment around me  
Not hurting the plants nor scaring the creatures  
Not polluting the air or the sea.

I will invent useful machines,  
That will help people and animals,  
So that the environment can be clean.

I try to make the world a bit better  
Hoping it will make others happy like a thank you letter  
I matter because ... I make the world a better place for others.
